## **Criterion-II**

### **TEACHING-LEARNING AND EVALUATION**

**2.3.1: Student centric methods, such as experiential learning, Participative learning and problem-solving methodologies are used for enhancing learning experiences using ICT tools**

**Submitted to**

**THE NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL**

## **Indicators: Teaching Learning Process:**

Student-centric methods such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences using ICT tools.

“How to teach” is a really difficult problem for the teacher. Teaching, as it is generally said, is an art, methods are the ways to understand and practice the art. Methods are nothing but the “how” of the subject matter. “How to impart knowledge”, “How to enable the students learn”. It is the final step of the execution of what we plan to teach in a particular subject.

We use different methods of teaching depending on the subject and the topic. Each and every method has some merits as well as demerits and hence it varies from topic to topic.

To make teaching a process of maximum possible participation of the students we use various student-centric methods like—experiential learning which means learning through experience. It is the process of learning by doing. It makes learning an experience that moves beyond the classroom and strives to bring a more involved way of learning. In this method, we generally engage the students in field-based activities especially for the Environmental Studies. Moreover, for the other disciplines we make the students going for different educational tours where they visit museums, science museums, historical places and they are able to connect the bookish knowledge with the real world environment through observation, interaction (with the people engaged in those places). Thus students acquire firsthand knowledge instead of reading about or hearing other’s experiences. This provides a valuable experiential learning which contributes significantly to the students’ overall understanding of the subject matter.

One of the student-centric methods is problem solving method. In this method we aim at presenting the knowledge to be acquired in the form of a problem. We begin with a problematic situation which consists of continuous, meaningful and well-integrated activity. The problems are set to the students in a natural way and it is ensured that the students are genuinely interested to solve them. The combination of Inductive and Deductive method is another student-centric method which we use in different topics of different subjects. It involves scientific thinking as a process of learning. In this method solutions of the problems always come from the students. We, the teachers remain in the background and direct or guide the students' activity from that position. Since, we cannot use a particular method for each and every topic hence besides these some student-centric methods like- analytic method, synthetic method, combination of Analytic method etc. Moreover, in a class of less enrollment we use information and communication technology like android mobile phone, laptop etc. Apart from these the classes in which the number of students is very large and when a large syllabus is to be covered in a short period of time we use lecture method. Since, in a large classroom the students remain inattentive and passive; we sometimes use Information and Communication Technology like (LCD) projector.

To make education accessible to the students who cannot attend classes regularly due to their engagement in household work and natural calamities like flood, pandemic etc. we take online classes and supply study materials through Google classroom and Whatsapp .

To ensure experiential, participative and problem solving learning, our college undertakes the following activities.

- A. Seminar /Workshop/ Conference
- B. Project
- C. Field Trip, Tour, Visit, Excursion

- D. College Magazine
- E. Wall Magazine
- F. Co-curricular Activities
- G. Educational Exchange Programme
- H. Sports/Games Activities
- I. Quiz, Debate Group discussion
- J. College Week
